A collage of various fresh foods including fruits, vegetables, meats, and grains. The items are arranged in a dense, overlapping manner. Visible items include a pomegranate, an avocado, almonds, green beans, blueberries, a lemon, eggs, a fish, raw meat, tomatoes, mushrooms, and various nuts and seeds. The background is a dark, textured surface.

A DESTABILIZING FOOD SHOCK

CONTROL ELEMENTS OF
FINANCIAL REPRESSION

AGENDA

• A SERIOUS HEALTH CRISIS

- EMERGENCE OF CHRONIC CONDITIONS
- EPIDEMICS, PANDEMICS & BIG PHARMA

• AN ADVANCING REGULATORY STATE

- BIG PHARMA, BIG AG, BIG TECH, BIG MEDIA
- BIG GOVERNMENT

• THE FOOD FENCE OF SCARCITIES

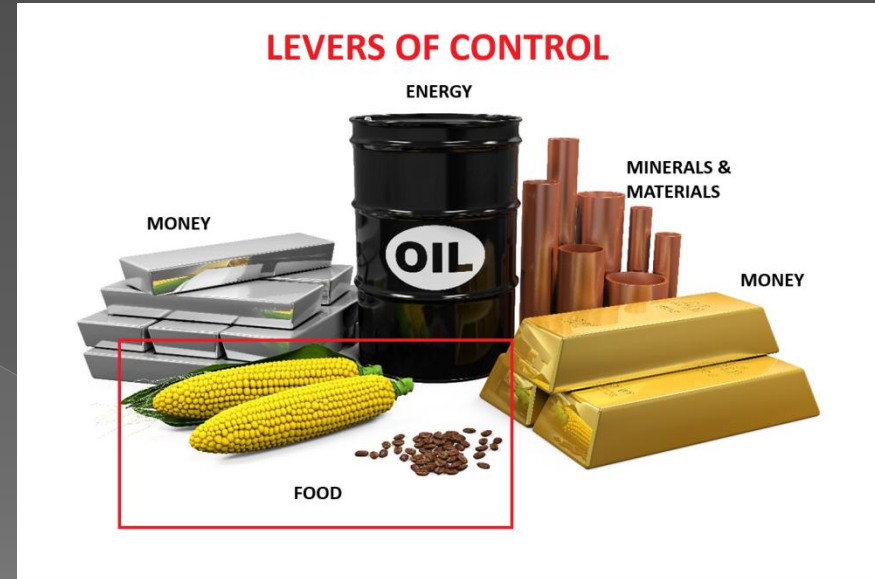

- BIG AG & RATIONING

• CONTROL

- DEPENDENCE & THE ELEMENTS OF CONTROL
- GBI, MMT & WTO/WHO

• CONCLUSIONS

- THE ROAD TO REGULATORY REPRESSION

<https://youtu.be/CvO3s8kFdiU>

- **AUTISM:** Autism rates were about one in 10,000 in my generation - in my kids Generation 1 in 34. I'll repeat in California 1 and 22. Why are we letting this happen? Why are we allowing this to happen to our children? These are the most precious assets that we have in this country how can we let this happen to them.
- **LIVER DISEASE:** About 18% of American teens now have fatty liver disease, that's like one out of every five - that disease when I was a kid only affected late stage alcoholics who were elderly.
- **CANCER:** Cancer rates are skyrocketing in the Young and the old young. Adult cancers are up 70 79%. One in four American women is on anti-depressant medication. About 40% of teens have a mental health diagnosis and 15% of high schoolers are on Aderall, and half a million children on SSRIs.

WHAT IS CAUSING THIS SUFFERING?

1- ULTRA-PROCESSED FOOD

About 70% of American children's diet is ultra-processed

- That means industrial manufacturing
- These Foods consist primarily of processed sugar, ultra-processed grains, and seed oils.

Scientists who, for many of them, formerly worked for the cigarette industry, which purchased all the big food companies in the 1970s and 80s, deployed thousands of scientists to figure out new chemicals to make the **food more addictive**.

- 1- These ingredients didn't exist a 100 years ago.
- 2- Humans aren't biologically adapted to eat them.
- 3- Hundreds of these chemicals are now banned in Europe but ubiquitous in American processed foods.

WHAT IS CAUSING THIS SUFFERING?

2- TOXIC CHEMICALS

Toxic chemicals in our food and our medicine and our environment. Pesticides food additives pharmaceutical drugs and toxic waste permeate every cell of our bodies.

The Assault on our children's cells and hormones is unrelenting

ESTROGEN

- Because young children are ingesting so many of these hormone disruptors, America's puberty rate is now occurring at age 10 to 13, which is six years earlier than girls were reaching puberty in 1900
- The US has the earliest puberty rates of any continent on the Earth and no this isn't because of better nutrition - this is not normal
- Breast cancer is also estrogen-driven and it now strikes one in eight women. We are mass poisoning all of our children.

BIG AG

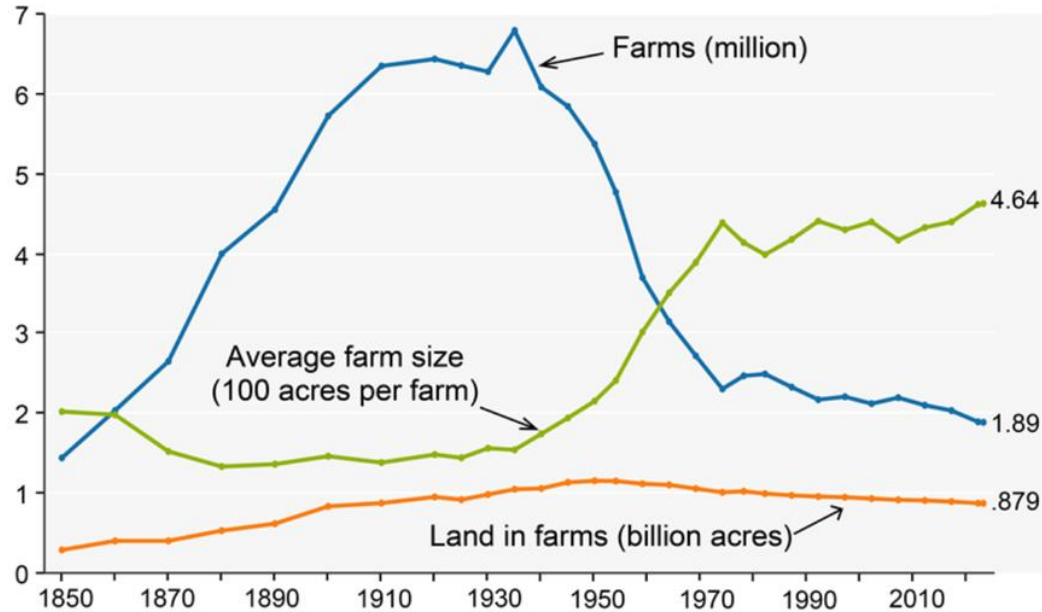

1. The processed food industry lobbyists have corrupted Washington, resulting in a food supply chain filled with poison that is killing Americans.
2. Several federal agencies that are supposed to protect consumers have also been corrupted.
3. The processed food industry has been "*destroying small farms, and they're destroying our soils.*"

The change of guard in farming across America and who controls the food supply chain has morphed from the people to the processed food industry. As mega-factory farms rise in power, inversely, small farms have been burdened by high operation costs and climate regulation - a stealthily way of bankrupting the small competition.

The number of U.S. farms continues slow decline

Farms, land in farms, and average acres per farm, 1850–2023

Million farms, billion acres, or 100 acres per farm

Source: USDA, Economic Research Service using data from USDA, National Agricultural Statistics Service, Census of Agriculture (through 2022) and *Farms and Land in Farms: 2023 Summary* (February 2024).

the Essentials

WHAT AM I TO BELIEVE?

- A CONTROL GROUP – THE AMISH

THE AMISH CONTROL GROUP

- One in five American children suffers from a chronic illness that has continued for more than a year.
- One in 36 of our youth have autism.
- One of every nine kids is diagnosed with ADHD.
- Americans take pills at a higher rate than almost any other country in the world.
- Two-thirds of adults are taking prescription drugs.
- More than one in four American teenagers is on at least one prescription drug – often to treat anxiety and depression.

• CONCLUSIONS

- THE ROAD TO REGULATORY REPRESSION

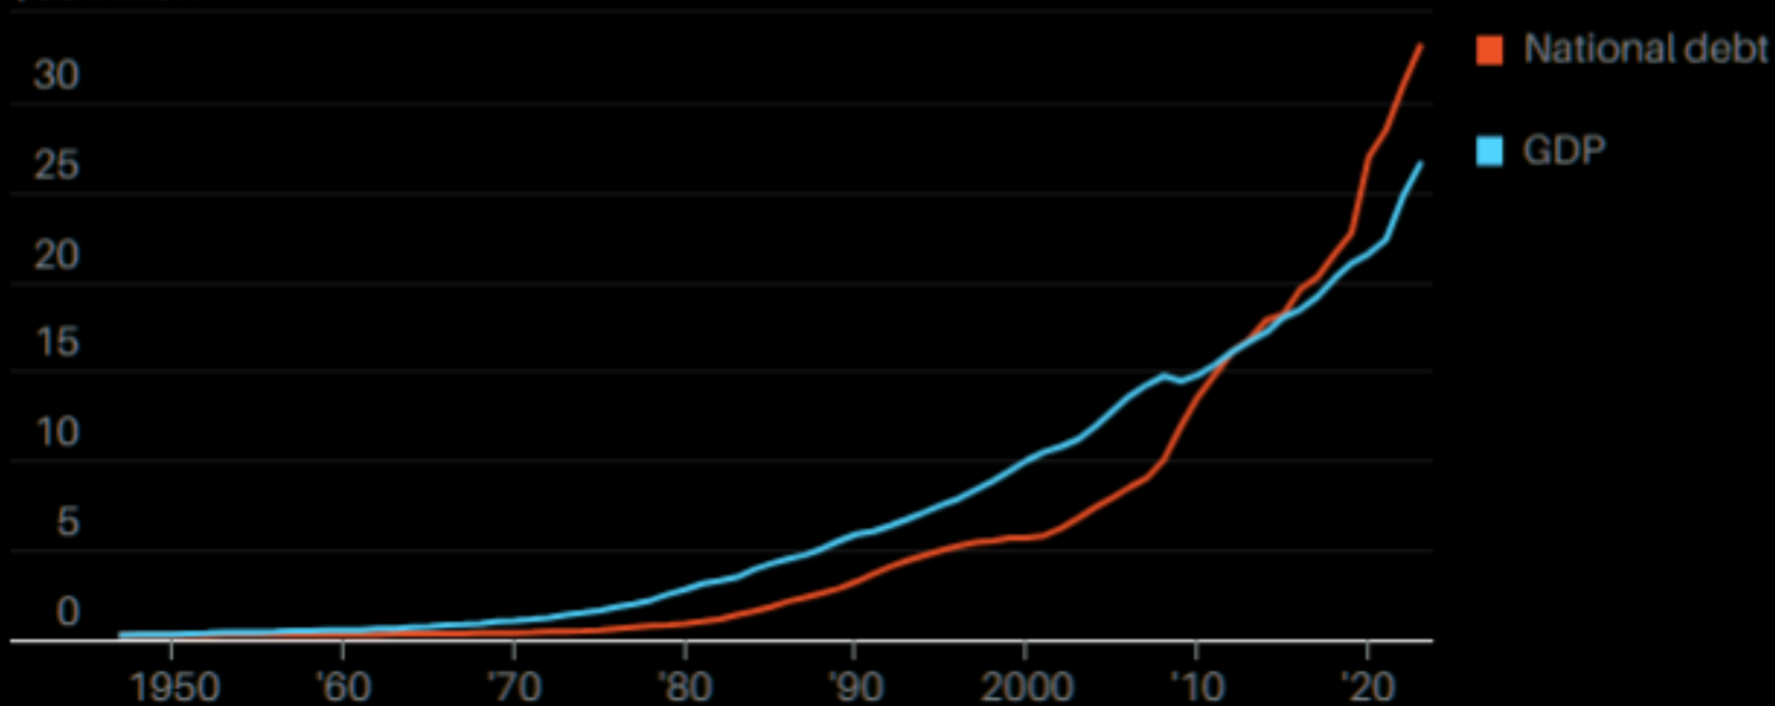

UnderTheLens- 07-24-
24 - AUGUST

The Exploding Cost of
Regulations

The U.S.'s national debt is growing faster than the economy.

\$35 trillion

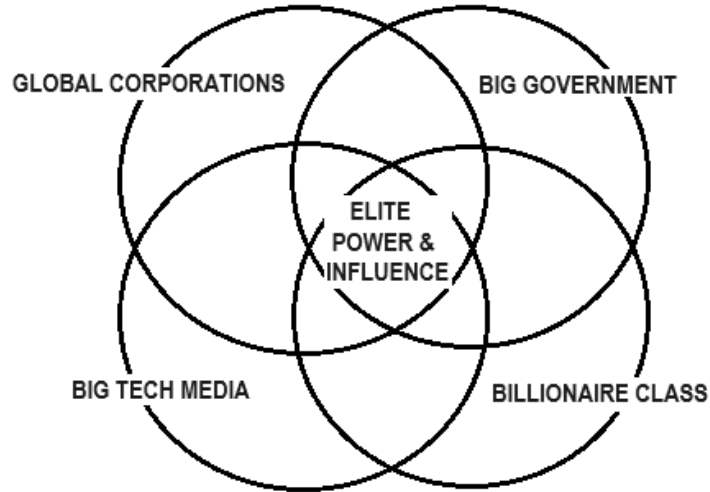

WHAT IT NOW TAKES TO GROW GDP

The Crisis Will Occur When Debt Growth No Longer Produces Growth.

- Globally it has already eroded to \$1 Debt for a \$1 of Growth.
- In the US it Takes as much as \$2.50 of New Debt to produce the \$1 of Growth.
- In the US it Takes as much as \$1.50 of Deficit Growth to produce the \$1 of Growth.
- Velocity of Money must be sustainably larger than Money Supply or GDP shrinks.

INFLUENCE ↔ CONTROL

EVOLVING SPHERES OF POWER & INFLUENCE

• CONTROL

- DEPENDENCE & THE ELEMENTS OF CONTROL
- GBI, MMT & WTO/WHO

• CONCLUSIONS

- THE ROAD TO REGULATORY REPRESSION

GOVERNMENT ATTACK ON FARMERS

NETHERLANDS:

LIVESTOCK REDUCTIONS

- The government is requiring a 30% reduction in livestock

NITROGEN CUTS

- Government mandating cuts in nitrogen of up to 95% – nitrogen that is released from cow manure and, if used properly, is an earth-friendly fertilizer.
- Denmark, Belgium, and Germany are considering similar nitrogen reduction policies.

SEIZURE & CLOSURES OF FARMS

- The government also plans to seize and shut down up to 3,000 farms to meet climate objectives. Protests by Dutch farmers have been met with force, including the police firing live ammunition rounds at protesters.

- Both the UK and US have already put schemes into place to **pay farmers not to farm.**
- In huge areas of the Midwest, large corporations are seizing prime farmland by eminent domain to install solar farms – installations that could instead be built in sunny, arid deserts where they would not disrupt the food supply.

GOVERNMENT ATTACK ON FARMERS

CANADA:

▪ FERTILIZER

- The goal is fertilizer reduction of 30%,
- Reductions in manure use on organic farms – the only viable alternative to chemical fertilizer.
- Farmers are ringing the alarm bells that this policy will devastate the food supply.

▪ MILK

- Even though milk prices are hitting record levels, Canadian officials still force farmers to dump their milk if they produce more than an arbitrary quota.
- Dairy owners are banned from giving the milk away to neighbors or homeless shelters.
- In Ontario, farmers cannot sell their milk directly to consumers at all, but must sell it to a single government-approved body which then decides how it is distributed.

IRELAND

CARBON EMISSIONS

- The agricultural sector has been ordered to cut carbon emissions by 25% in the next seven years.
- This requirement will drive many farms into bankruptcy and will force the culling of hundreds of thousands of cows.

ORGANIZATIONS TO WATCH CAREFULLY

- Bayer/Monsanto
- Cargill and the US Department of Agriculture (USDA)
- Wellcome Trust
- The World Health Organization
- World Economic Forum
- EAT Forum, the *Lancet*, and their Big Tech and Big Chemical Partners
- The Rockefeller Foundation
- Bill Gates and the Gates Foundation
- USAID and BIFAD

In his 1951 book *The Impact of Science on Society*, the Nobel Prize-winning British mathematician, philosopher, and eugenicist Bertrand Russell forecast a future where the elites would use science as a means to control the population:

“Diet, injections, and injunctions will combine, from a very early age, to produce the sort of character and the sort of beliefs that the authorities consider desirable, and any serious criticism of the powers that be will become psychologically impossible. Even if all are miserable, all will believe themselves happy, because the government will tell them that they are so.”

In *The Scientific Outlook*, Russell also wrote: *“[In the future], [children’s] diet(s) will not be left to the caprices of parents, but will be such as the best biochemists recommend.”*

FOOD FREEDOM and MEDICAL FREEDOM

... are two sides of the same coin

If we don't protect both, we will lose everything.

Diet, injections, and Injunctions are an integrated plan.

ONE HEALTH

- The term “One Health” was coined after the first SARS outbreak in the early 2000s to reflect the danger of new diseases emerging from human-animal contact. It refers to the idea of public health being not just about your health but also about “planetary” and animal health.
- It is framed in language designed to sound appealing and holistic.
 - Embedded within it is the assumption that, because planetary health is at stake, there must be **a global governing body with control** over all plants, animals, and human beings to guard this “one health” and to “sustainably balance the health of people, animals, and ecosystems,” with equity between prioritizing animals, the environment, and your personal health.
- The One Health concept has incredibly dangerous ramifications which should be apparent when you consider who is pushing it: the WHO, the World Bank, Bill Gates, the Rockefeller Foundation, the NIH, the CDC, USDA, FDA, and every other Covid vested spokesperson you can think of.

HOW WILL THE GOVERNMENT RESPOND?

1. How will it address Parabolic Debt Growth?

- **Higher Levels of Inflation (>3%)**

2. How will it address Economic Growth?

- **Off Balance Sheet Contingent Liability Guarantees**
- **US National Wealth Fund**

Preparing For How the Government Can Be Expected to react is your "Job One"!

In response to a crisis, the state can be expected to resort to drastic measures such as:

1. Imposing price and capital controls,
2. Nationalizing banks and large corporations, and
3. Transforming the economy into a highly regulated command economy.

READ:
2024 THESIS

“THE REGULATORY STATE”

COMMODITIES AS A CORE PORTFOLIO HOLDING

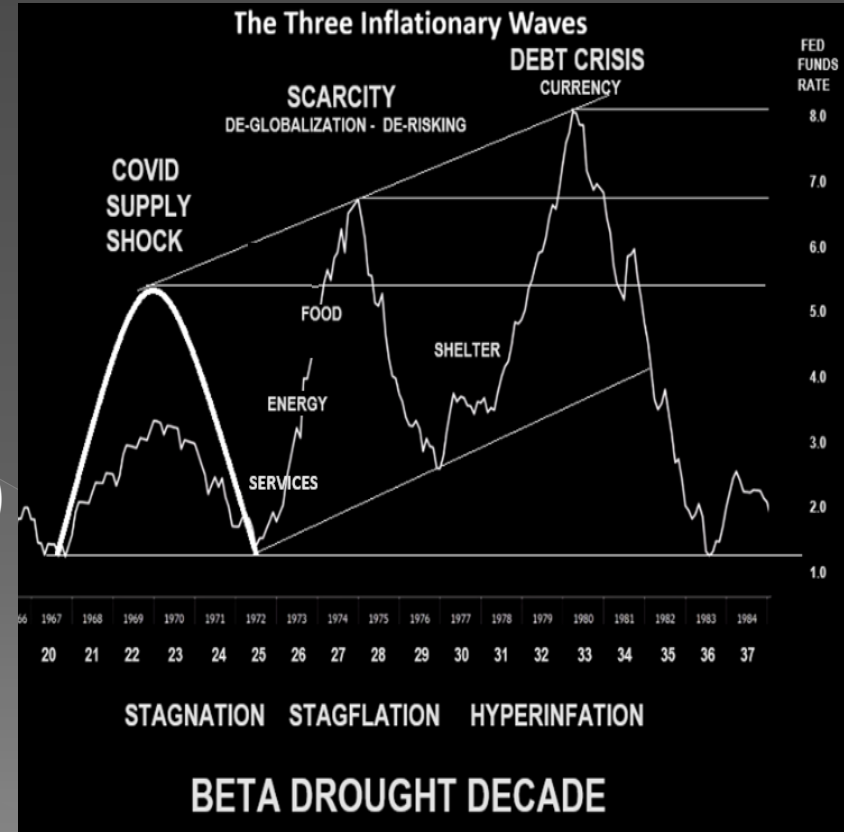

WAVE 2 is still ahead AND WILL BE ABOUT:

- Services (Skilled Wage Pressures)
- Import (Costs (Tariffs))
- Energy (Regulatory Crippling of Utilities)
- Food (Regulatory Crippling of Supply)

WAVE 3 is likely TO BE ABOUT:

- Shelter (Shortage and Property Tax Rates)
- US\$ Weakness (Currency Debasement)

ADMINISTRATIONS CHANGE – BUT THE PRINTING NEVER DOES ...

DON'T WORRY, THEY WILL PRINT THE MONEY!

EVERYONE IS NOW IN PLACE & READY!!
